UNIVERSITY OF MUMBAI

Syllabus for F.Y.B.Sc.

( Restructured)

Programme : B.Sc.

Course: Biotechnology

with effect from the academic year

2016 – 2017
Preamble:

Twenty First Century is known as the ‘Century of Biotechnology’. Biotechnology is one of the youngest branches of Life Science, which has expanded and established as an advanced interdisciplinary applied science in last few years. Biotechnology at the core envisages the comprehensive study of Life and the Interdisciplinary potential of Biotechnology has led to a unique status for Biotechnology in Research and Industry.

The socio-economic potential of Biotechnology is well established which has almost become synonymous with modern development. Biotechnology has its applications in almost every field touching practically every human activity. The applied aspect of Biotechnology is now getting established with its applications in Industry, Agriculture, Health and Environment, Biotechnology is the lead science expanding exponentially.

Biotechnology demands a trained, skilled human resource to establish the Industry and Research sectors. The field is novel and still expanding which demands inputs in Infrastructure and Technology. The global and local focus is on developing new technological applications is fast growing. Biotechnology sector in Research and Industry is expanding which is set to augur the next major revolution in the world.

The demand for trained workforce in Biotechnology is ever growing in Fundamental Research and Industry Sector. Academic and Research Sectors also require interdisciplinary trained manpower to further the Biotechnology Revolution.

The need of the hour is to design appropriate syllabi which keeps pace with changing times and technology with emphasizes on applications while elucidating technology in depth. The present Syllabi is Restructured anticipating the future needs of Biotechnology Sector with more emphasis on imparting hands-on skills. The main thrust is laid on making syllabus compatible with developments in Education, Research and Industrial sectors. The Theory and Practical course in new restructured course will lead to impart skill-set essentials to further Biotechnology Sector.

The restructured syllabus combines basic principals of Physical, Chemical and Biological sciences in light of advancements in technology. The curriculum aims to impart basic knowledge with emphasis on its applications to make the students industry ready.

SEMESTER – I

THEORY
## SEMESTER I

**Basic Chemistry-I**

<table>
<thead>
<tr>
<th>COURSE CODE</th>
<th>TITLE</th>
<th>CREDITS</th>
<th>Notional Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>USBT 101</td>
<td>Basic Chemistry I</td>
<td>2</td>
<td></td>
</tr>
</tbody>
</table>

**Course Objective**: To acquaint the students with basic concepts of Chemistry like Classification and Nomenclature of Chemical compounds

**Learning Outcome**: To impart hands-on skills in preparation of Buffers and Solutions

### Unit I  
**Nomenclature and Classification**

<table>
<thead>
<tr>
<th><strong>Nomenclature and Classification of Inorganic Compounds:</strong></th>
<th>Oxides, Salts, Acids, Bases, Ionic, Molecular and Coordination Compounds</th>
</tr>
</thead>
</table>

15 Lectures  30 hrs

### Unit II  
**Chemical Bonds**

<table>
<thead>
<tr>
<th><strong>Ionic Bond</strong></th>
<th>Nature of Ionic Bond, Structure of NaCl, KCl and CsCl, factors influencing the formation of Ionic Bond.</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Covalent Bond</strong></td>
<td>Nature of Covalent Bond, Structure of CH4, NH3, H2O, Shapes of BeCl2, BF3</td>
</tr>
<tr>
<td><strong>Coordinate Bond</strong></td>
<td>Nature of Coordinate Bond</td>
</tr>
<tr>
<td><strong>Non Covalent Bonds</strong></td>
<td>Van Der Waal’s forces: dipole - dipole, dipole – induced dipole.</td>
</tr>
<tr>
<td><strong>Hydrogen Bond</strong></td>
<td>Theory of Hydrogen Bonding and Types of Hydrogen Bonding (with examples of RCOOH, ROH, Salicylaldehyde, Amides and Polyamides).</td>
</tr>
</tbody>
</table>

15 Lectures  30 hrs

### Unit III  
**Water and Buffers**

| **Chemistry of Water:** | Properties of Water, Interaction of Water with Solutes (Polar, Non-Polar, Charged), Non-Polar Compounds in Water – Change in its Structure and the Hydrophobic Effect, Role of Water in Biomolecular Structure and Function and Water as a Medium for Life |

15 lectures  30 hrs
Solutions: Normality, Molarity, Molality, Mole fraction, Mole concept, Solubility, Weight ratio, Volume ratio, Weight to Volume ratio, ppb, ppm, millimoles, milliequivalents (Numericals expected).

Buffer solutions – Concept of Buffers, Types of Buffers, Derivation of Henderson equation for Acidic and Basic buffers, Buffer action, Buffer capacity (Numericals expected.) pH of Buffer Solution.

### SEMESTER I

Basic Chemistry-II

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

**Course Objective**: To acquaint students with Concepts of Stereochemistry

**Learning Outcome**: To impart knowledge of Titrimetric and Volumetric Estimations and handling of basic Analytical Techniques like Chromatography and Colorimetry

**Unit I**

**Stereochemistry**

**Isomerism** – Types of Isomerism: Constitutional Isomerism (Chain, Position and Functional) and Stereoisomerism, Chirality.

**Geometric Isomerism and Optical Isomerism**: Enantiomers, Diastereomers, and Racemic mixtures Cis-Trans, Threo, Erythro and Meso isomers. Diastereomerism (Cis-Trans Isomerism) in Alkenes and Cycloalkanes (3 and 4 membered ring)

**Conformation**: Conformations of Ethane. Difference between Configuration and Conformation.

**Configuration**: Asymmetric Carbon Atom, Stereogenic/Chiral Centers, Chirality.

|                  | 15 Lectures | 30 hrs |
### Unit II

**Titrimentry and Gravimetry**

<table>
<thead>
<tr>
<th>Titrimentry Analysis:</th>
<th>Titration, Titrant, Titrand, End Point, Equivalence Point, Titration Error, Indicator, Primary and Secondary Standards, Characteristics and examples</th>
</tr>
</thead>
</table>

**Gravimetric Analysis:**

### Unit III

**Analytical Techniques**

<table>
<thead>
<tr>
<th>Methods of Separation</th>
<th>Precipitation, Filtration, Distillation and Solvent Extraction. <strong>Analytical Techniques</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td>Chromatography:</td>
<td><strong>Definition, Principles, Types</strong> Introduction to Paper Chromatography, Thin Layer Chromatography, Column Chromatography and its Applications.</td>
</tr>
<tr>
<td><strong>Colorimetry:</strong></td>
<td>Principle, Beer-Lambert’s Law, Measurement of Extinction, Derivation of E = kcl, Limitations of Beer-Lambart’s Law, Filter Selection</td>
</tr>
</tbody>
</table>

15 Lectures | 30 hrs
### SEMESTER I

**Basic Life Sciences-I : Biodiversity and Cell Biology**

<table>
<thead>
<tr>
<th>COURSE CODE</th>
<th>TITLE</th>
<th>CREDITS</th>
<th>Notional Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>USBT 103</td>
<td>Biodiversity and Cell Biology</td>
<td>2</td>
<td></td>
</tr>
</tbody>
</table>

**Course Objectives**: To acquaint students with concept of Biodiversity and Cell Biology

**Learning Outcome**: To impart skill in handling and culture of Microorganisms

**Unit I**

- **Origin of Life and Biodiversity**
  - (Animal, Plant, Microorganisms)
  - Origin of Life, Chemical and Biological Evolution, Origin of Eukaryotic Cell.
  - Concept of Biodiversity, Taxonomical, Ecological and Genetic Diversity & its Significance
  - **Introduction to Plant Diversity**: Algae, Fungi, Bryophyta, Pteridophyta, Gymnosperms and Angiosperms (with one example each)
  - **Introduction to Animal Diversity**: Non-Chordates and Chordates (with at least one representative example.)
  - **Introduction to Microbial Diversity**: Archaeabacteria, Eubacteria, Blue-green Algae, Actinomycetes, Eumycota- Habitats, Examples and Applications.

**Course Objectives:** To acquaint students with basic techniques in Staining and Sterilization

**Learning Outcome:** To impart the knowledge of growth of microorganisms

#### Unit I

**Microscopy and Stains**

- Dark Field and Phase Contrast Microscope

15 lectures 30 hrs

#### Unit II

**Sterilization Techniques**

- Definition : Sterilization and Disinfection. Types and Applications
- Dry Heat, Steam under pressure,

15 lectures 30 hrs
Gases, Radiation and Filtration
Chemical Agents and their Mode of Action - Aldehydes, Halogens, Quaternary Ammonium Compounds, Phenol and Phenolic Compounds, Heavy Metals, Alcohol, Dyes, and Detergents

Ideal Disinfectant. Examples of Disinfectants and Evaluation of Disinfectant

**Course Objectives:** To acquaint students with DNA Replication, Repair and Genetic Engineering  
**Learning Outcome:** Impart the knowledge of molecular Biology Techniques

### Unit I - Replication

- DNA Replication in Prokaryotes and Eukaryotes
  - Semi-conservative DNA replication
  - DNA Polymerases and its role
  - E.coli Chromosome Replication
  - Bidirectional Replication of Circular DNA molecules
  - Rolling Circle Replication, DNA Replication in Eukaryotes
  - DNA Recombination – Holliday Model for Recombination Transformation

### Unit III - Genetic Engineering

- Experimental evidences for DNA and RNA as Genetic Material
- Genetic Engineering in Ecoli and other Prokaryotes, Yeast, Fungi and Mammalian Cells
- Cloning Vectors-Plasmids (pBR 322, pUC)
- Vectors for Plant and Animal Cells, Shuttle Vectors, YAC Vectors, Expression Vectors
- Enzymes- DNA Polymerases, Restriction Endonucleases, Ligases, Reverse Transcriptases, Nucleases, Terminal Transferases, Phosphatases
- Isolation and Purification of DNA (Genomic, Plasmid) and RNA,
- Identification of Recombinant Clones

1. Safety Measures and Practices in Chemistry Laboratory, Working and use of a Digital Balance, Functioning and Standardization of \( p\)H Meter, Optical Activity of a Chemical Compounds by Polarimeter
2. Preparation of Standard (Molar, Molal and Normal solutions) and Buffer Solutions
   Determination of strength of HCl in commercial sample
3. Qualitative Analysis of Inorganic Compounds - Three experiments
5. To Standardize commercial sample of NaOH using KHP (Potassium hydrogen pthalate) and sample of HCl using borax.
6. Dissociation Constant of Weak Acids by Incomplete Titration Method using \( p\)H Meter and determination of Acetic acid in Vinegar by Titrimetric Method
7. Determination of the amount of Fe (II) present in the given solution Titrimetrically
8. Determination of amount of NaHCO\(_3\) + Na2CO\(_3\) in the given solid mixture Titrimetrically
9. Determination of the amount of Mg (II) present in the given solution complexometrically
10. Determination of percent composition of BaSO\(_4\) and NH4Cl in the given mixture Gravimetrically
11. Separation of Cu, Ni and Fe using Paper Chromatography and amino acids - paper chromatography
12. Determination of fluoride ion using Colorimetry and Fe (III) by using Salicylic Acid by Colorimetric Titration

1. Components and working of Simple, Compound, Dark Field, Fluorescent and Phase Contrast Microscope
2. Staining of Plant and Animal Tissues using Single and Double Staining Techniques
3. Special Staining Technique for Cell Wall, Capsule and Endospores and Fungal Staining
4. Monochrome Staining, Differential Staining, Gram Staining, and Acid Fast Staining and Ronomowsky Staining
5. Study of Plant, Animal and Microbial Groups with at least one examples from each x 3
6. Study of Photomicrographs of Cell Organelles
7. Sterilization of Laboratory Glassware and Media using Autoclave
8. Preparation of Media- Nutrient broth and Agar, MacConkey Agar, Sabourauds Agar
9. Isolation of Organisms : T-streak, Polygon method
10. Enumeration of microorganisms by Serial Dilution, Pour Plate, Spread Plate Method
11. Colony Characteristics of Microorganisms, Enumeration by Breed’s count
12. Growth Curve of E.Coli

_Course Objectives:_ To acquaint students with concepts in Thermodynamics, Kinetics and Redox Reactions

_Learning Outcome:_ To impart skills in Kinetics and Chemical Reactions

**Unit I** Thermodynamics

**Thermodynamics:**
System, Surrounding, Boundaries Sign Conventions, State Functions, Internal Energy and Enthalpy: Significance, examples, (Numericals expected.)

15 lectures 30 hrs

**Unit II** Chemical Kinetics

**Reaction Kinetics:**
Rate of Reaction, Rate Constant, Measurement of Reaction Rates Order & Molecularity of Reaction, Integrated Rate Equation of First and Second order reactions (with equal initial concentration of reactants). (Numericals expected)
Determination of Order of Reaction by a) Integration Method b) Graphical Method c) Ostwald’s Isolation Method d) Half Time Method. (Numericals expected).

15 lectures 30 hrs

**Unit III** Oxidation Reduction reactions

**Principals of Oxidation & Reduction Reactions**
Oxidising and Reducing Agents, Oxidation Number, Rules to assign Oxidation Numbers with examples Ions like

15 lectures 30 hrs

---

**SEMESTER II**

**Course Objectives:** To acquaint students with Physiological Processes in Plants and Animals

**Learning Objectives:** To impart the knowledge of Physiology and Ecology

### Unit I
**Plant Physiology**

- Plant hormones - Auxin, Gibbrellins, Cytokinins, Ethylene, Abscisic acid
- Introduction to Secondary Metabolites

15 lectures 30 hrs

### Unit II
**Animal Physiology**

- Physiology of Digestion
- Movement of Food and Absorption, Secretary functions of Alimentary Canal, Digestion and Absorption, assimilation in Gut of Mammals
- Anatomy of Mammalian Kidney, Structure of Nephron, Physiology of Urine Formation and Role of Kidney in Excretion and Osmoregulation
- Physiology of Respiration, Mechanism of Respiration Principles of Gaseous Exchange in the Blood and Body Fluids
- Blood and Circulation: Blood Composition, Structure and Function of its Constituents

15 lectures 30 hrs

**Course Objectives:** To acquaint students with concepts in Genetics

**Learning Objectives:** To impart skills in Techniques in Genetic Analysis and Population Genetics

### Unit I
**Genetics Fundamentals**
- Mendel’s Laws of Heredity
- Monohybrid Cross: Principle of Dominance and Segregation.
- Dihybrid Cross: Principle of Independent Assortment.
- Application of Mendel’s Principles
- Punnett Square.
- Mendel’s Principle in Human Genetics.
- Incomplete Dominance and Co-dominance.
- Multiple Alleles Allelic series.
- Variations among the effect of the Mutation.
- Genotype and Phenotype.
- Environmental effect on the expression of the Human Genes.
- Gene Interaction.
- Epistasis.

**Course Objectives**: To acquaint students with Techniques of Plant and Animal Tissue Culture

**Learning Outcome**: To impart the skills of PTC, ATC and Science Communication

#### Unit I

**Plant Tissue Culture**

- Cell Theory, Concept of Cell Culture, Cellular Totipotency, Organization of Plant Tissue Culture Laboratory:
  - Equipments and Instruments
  - Aseptic Techniques: Washing of Glassware, Media Sterilization, Aseptic Workstation, Precautions to maintain Aseptic Conditions.
  
  - Culture Medium: Nutritional requirements of the explants, PGR’s and their *in-vitro* roles, Media Preparation
  
  - Callus Culture Technique: Introduction, Principle and Protocols

15 lectures  30 hrs
Unit II
Animal Tissue Culture

Basics of Animal Tissue Culture
Introduction
Cell Culture Techniques, Equipment and Sterilization Methodology.
Introduction to Animal Cell Cultures: Nutritional and Physiological: Growth Factors and Growth Parameters. General Metabolism and Growth Kinetics
Primary Cell Cultures: Establishment and Maintenance of Primary Cell Cultures of Adherent and Non-Adherent Cell Lines with examples. Application of Cell Cultures

15 lectures 30 hrs

Unit III
Scientific Writing and Communication Skills

Communication Skills
Introduction to Communication -- Elements, Definitions, Scope of Communication and Communication as part of Science Communication Elements -- Verbal and Non-Verbal Communications. Principles of Effective Communication, Oral Presentations Scientific Reading, Writing & Presentation

Scientific Writing
Process of Scientific Writing: Thinking, Planning, Rough Drafts and Revising Contents. Introduction to Scientific Reports and Writings

15 lectures 30 hrs

1. Working and use of various Instruments used in Biotechnology Laboratory (Autoclave, Hot air Oven, Centrifuge, Incubator, Rotary Shaker, Filter Assembly, LAF, pH meter and Colorimeter)

2. Laboratory Organization and Layout for Plant and Animal Tissue Culture Laboratory
3. Preparation of Stock Solutions and Preparation of Media for PTC
4. Aseptic Transfer Technique, Surface Sterilization and Innoculation for Callus Culture
5. Media Preparation and Sterilization (ATC)
6. Trypsinization of Tissue and Viability Count
7. Qualitative Assay of Enzyme Amylase, Lipase, Protease, Urease, Catalase and Dehydrogenase
9. Study of Effect of Substrate Concentration on enzyme activity and determination of Vmax and Km
10. Study of antigen antibody interaction by Ouchterlony method
11. Biometric Analysis for Mean, Median, Mode and Standard Deviation and Data representation using frequency Polygon, Histogram and Pie Diagram
12. Preparation of review reports of 5 Scientific Papers and Presentation (last 5 years)
Semester – I and II

Ability Enhancement Course 1 (FC I)
Ability Enhancement Course 2 (FC II)
# SEMESTER I

**Ability Enhancement Course 1 (FC I)**

**Societal Awareness**

<table>
<thead>
<tr>
<th>COURSE CODE</th>
<th>TITLE</th>
<th>CREDITS</th>
<th>Notional Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>USBT 107</td>
<td>Societal Awareness</td>
<td>2</td>
<td></td>
</tr>
</tbody>
</table>

**Course Objective**: To acquaint the students with concepts of Societal Awareness

**Learning Outcome**: To impart knowledge of Society and make students aware about the Problems in Society

### Unit I
**Overview of Indian Society**

- Understand the multi-cultural diversity of Indian society through its demographic composition: population distribution according to religion, caste, and gender; Appreciate the concept of linguistic diversity in relation to the Indian situation; Understand regional variations according to rural, urban and tribal characteristics; Understanding the concept of diversity as difference

- **15 Lectures**
- **30 hrs**

### Unit II
**Concept of Disparity**

- **Concept of Disparity-I**
  - Understand the concept of disparity as arising out of stratification and inequality;
  - Explore the disparities arising out of gender with special reference to violence against women, female foeticide (declining sex ratio), and portrayal of women in media; Appreciate the inequalities faced by people with disabilities and understand the issues of people with physical and mental disabilities

- **Concept of Disparity-II**
  - Examine inequalities manifested due to the caste system and inter-group conflicts arising thereof; Understand inter-group conflicts arising out of communalism; Examine the causes and effects of conflicts arising out of regionalism and linguistic differences

- **15 Lectures**
- **30 hrs**

### Unit III
**The Indian Constitution and Significant Aspects of Political Processes**

- **The Indian Constitution**
  - Philosophy of the Constitution as set out in the Preamble; The structure of the Constitution-the Preamble, Main Body and Schedules; Fundamental Duties of the Indian Citizen; tolerance, peace and communal harmony as crucial values in strengthening the social fabric of Indian society; Basic features of the Constitution

- **Significant Aspects of Political Processes**
  - The party system in Indian politics; Local self-government in urban and rural areas; the 73rd and 74th Amendments and their implications for inclusive politics; Role and significance of women in politics

- **15 lectures**
- **30 hrs**

**Topics for Project Guidance: Growing Social Problems in India:**

- Substance abuse- impact on youth & challenges for the future
- HIV/AIDS- awareness, prevention, treatment and services
- Problems of the elderly-causes, implications and response
- Issue of child labour-magnitude, causes, effects and response
- Child abuse- effects and ways to prevent
- Trafficking of women-causes, effects and response
**SEMESTER II**

**Ability Enhancement Course 2 (FC II)**

**Globalization, Ecology and Sustainable Development**

<table>
<thead>
<tr>
<th>COURSE CODE</th>

<th>CREDITS</th>
<th>Notional Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>USBT 207</td>
<td>Globalization, Ecology and Sustainable Development</td>
<td>2</td>
<td></td>
</tr>
</tbody>
</table>

**Course Objective:** To acquaint the students with concepts of Globalization, Ecology and Environment

**Learning Outcome:** To impart knowledge of Globalization, make students aware about the Problems in Society

### Unit I

**Globalisation and Indian Society and Human Rights**

**Globalisation and Indian Society**
Understanding the concepts of liberalization, privatization and globalization; Growth of information technology and communication and its impact manifested in everyday life; Impact of globalization on industry: changes in employment and increasing migration; Changes in agrarian sector due to globalization; rise in corporate farming and increase in farmers’ suicides.

**Human Rights**
Concept of Human Rights; origin and evolution of the concept; The Universal Declaration of Human Rights; Human Rights constituents with special reference to Fundamental Rights stated in the Constitution

15 Lectures 30 hrs

### Unit II

**Ecology and Sustainable Development**

Importance of Environment Studies in the current developmental context; Understanding concepts of Environment, Ecology and their interconnectedness; Environment as natural capital and connection to quality of human life; Environmental Degradation causes and impact on human life; Sustainable development, concept and components; poverty and environment

15 Lectures 30 hrs

### Unit III

**Understanding and Managing Stress and Conflict in Contemporary Society**

**Understanding Stress and Conflict**
Causes of stress and conflict in individuals and society; Agents of socialization and the role played by them in developing the individual; Significance of values, ethics and prejudices in developing the individual; Stereotyping and prejudice as significant factors in causing conflicts in society. Aggression and violence as the public expression of conflict

**Managing Stress and Conflict in Society**
Types of conflicts and use of coping mechanisms for managing individual stress; Maslow’s theory of self-actualisation; Different methods of responding to conflicts in society; Conflict-resolution and efforts towards building peace and harmony in society

15 lectures 30 hrs

**Topics for Project Guidance: Growing Social Problems in India:**
- Increasing urbanization, problems of housing, health and sanitation;
- Changing lifestyles and impact on culture.
- Farmers’ suicides and agrarian distress.
- Debate regarding Genetically Modified Crops.
- Development projects and Human Rights violations.
- Increasing crime/suicides among youth.
Evaluation Scheme

The performance of the learners shall be evaluated into TWO Parts.

The learner’s performance shall be assessed by Internal Assessment with 25 marks & by conducting the Semester End Examinations with 75 marks.

Practical Training will have Practical Examination for 50 marks at the end of Semester.

The allocation of marks for the Internal Assessment and Semester End Examinations are as follows:-

I. **Internal Exam-25 Marks**
   - (i) **Test** – 20 Marks
   - (ii) **Activities** - 5 Marks

II. **External Examination- 75 Marks**
   - (i) Theory Question Paper Pattern:
     
     | Question | Based on     | Marks |
     |----------|--------------|-------|
     | Q.1      | Unit I       | 20    |
     | Q.2      | Unit II      | 20    |
     | Q.3      | Unit III     | 20    |
     | Q.4      | Unit I,II and III | 15   |

   - All questions shall be compulsory within the questions.
   - Each Question may be sub-divided into sub questions as a, b, c, d & e, etc & the allocation of Marks depends on the weightage of the topic.

III. **Practical Examination – 300 marks (50 marks x 6 core papers)**
    
    *Each Core Subject Carries 50 Marks*
    
    **Chemistry**: 30 marks + 10 marks (Journal)+ 10 marks(Viva-voce)
    
    **Life Sciences and Biotechnology**: Major (20 marks), Minor (10 marks), Identification /Spots (10 marks), Viva-voce (5 marks), Journal (5 marks)

IV. **Ability Enhancement Course**

V. **Internal Exam-25 Marks**
   - (iii) **Project**– 20 Marks
   - (iv) **Activities** - 5 Marks

VI. **External Examination- 75 Marks**

**Question Paper Pattern**

Maximum Marks: 75, Questions to be set:04, Duration: 02 and 1/2 Hrs.

All Questions are Compulsory

Q-1 Objective Questions - 20Marks
   - A) Sub Questions to be asked 12 and to be answered any 10
   - B) Sub Questions to be asked 12 and to be answered any 10

   (*Multiple choice / True or False / Match the columns/Fill in the blanks)

Q-2 Full Length Question – 20 Marks

   OR
   Full Length Question

Q-3 Full Length Question – 20 Marks

   OR
   Full Length Question

Q-4 Short Notes – 15 Marks (To be asked 06 To be answered 03)

*Note: Theory question of 15 marks may be divided into two sub questions of 7/8 and 10/5Marks.*
