Solvent extraction of silver(I) with 2-mercaptobenzimidazole into chloroform

by Bagla, Hemlata (Radio and Nuclear Chemistry Lab., K.C. College, Mumbai (India))

from Proceedings of nuclear and radiochemistry symposium

[en] The paper describes a method developed for the solvent extraction and radiochemical separation of Ag(I) employing 2-mercaptobenzimidazole into chloroform using ^{110}mAg as a tracer for establishing ideal extraction parameters. (author)

Subject INORGANIC, ORGANIC, PHYSICAL AND ANALYTICAL CHEMISTRY (B1130)
