**Rerouting...**

**FROM CODE RED**

**TO CODE GREEN**

**Let's Restore, Recharge, and  
Redevelop a Greener Earth**

# WHAT IS CODE RED?

- The United Nations Climate Panel warned in a landmark report on August 9, 2021, that **global warming is dangerously close to spiralling out of control**.
- This report by the Intergovernmental Panel on Climate Change (IPCC), draws on more than 14,000 scientific studies, providing the most comprehensive and detailed picture yet, of how climate change is affecting the natural world and what may lie ahead.
- The scientists involved highlighted that this current situation is **undoubtedly the fault of humans**. Further, the UN Secretary General, António Guterres stated that it is a **"Code Red"** for humanity.

## ABOUT 'REROUTING FROM CODE RED TO CODE GREEN'

### WHY?

- Now that we are **almost nearing the point where the damage done becomes irreversible**, the Earth requires everyone to unite in solidarity. There is an urgent need to reverse the situation, i.e., **Reroute from Code Red to Code Green**.
- **Education** is a critical component in this urgent fight against Code Red. Knowledge regarding this crisis would **assist people in understanding and dealing with the consequences of global warming and other environmental concerns**; thus, encouraging a change in their behaviour and perspective, and helping them adapt to what is already a global emergency.
- With this in mind, the Faculty of Science and Technology at HSNC University, has decided to take the initiative to **raise awareness** of this current situation as well as **listen to and implement ideas from across the globe**. Through this we aim to restore mother Earth to her original green-self.

We the students of HSNC University, aspire to **unite the youth all across the world** to come together and respond to these Code Red alarms which have been rung. We believe that it is important for us to understand how drastically the climate is changing and bring together innovative ideas at **Glocal** (i.e., both global and local) levels to prepare ourselves for the future.

In order to go from Code Red to Code Green we **cannot stop at just one activity**, we must put in dedicated efforts constantly. Therefore, to bring about resolute change, we wish to conduct a plethora of events including:

- **Awareness Programs:** Competitions, Webinars, Conclaves
- **Training Programs:** Workshops, Hands-on activities
- **Resource Generation:** SOPs, Manuals, Videos

**LET'S JOIN HANDS**
