## **Story Writing Competition**

"Storytelling is the most powerful way to put ideas into the world."

~ Robert McKee, Author

10th of February, 2022 marked an important day for the Science Departments of K. C. College, HSNC University as Scicode #22 - It's All About Innovation, the Science Festival of K. C. College was held on this day. The Nature Club, K. C. College, also joined hands for this to add on to the fun and learning.

Sci-Code is a legacy Science Festival hosted by the Faculty of Science and Technology, K. C. College under the aegis of DBT Star Status. It is held on an interdisciplinary level for all students from Science Departments. As the name suggests, the festival aims to help the students explore their innovative ideas and help them bloom.

On the other hand, Nature Club, K. C. College is a committee that works to bring about a change in people's understanding of nature and helps create a positive impact on nature by the collective action of like-minded people. Under the platform of Sci-Code #22, the Nature Club organized a story writing competition, namely, Talefactory. The process of writing and moulding a story from ideas is innovation. Thus, the aim of this event was to encourage participants to craft stories of innovation that appeal to readers' emotions and help new ideas cut through the clutter.

The students were given three themes to build their story on -

**A Novel Idea that Changed the World:** A story of an inventor that made you think

**Experience to Invention:** A personal experience that inspired you to create

**Innovation - The New Reality:** An existing innovation that changed your life

The event was held on an online platform and saw 13 registrations for the competition and 6 entries were received. The participants had put in the hard yard to write phenomenal stories. This was clearly evident through their exceptionally intriguing stories that really brought out the essence of the themes. In conclusion, there is science in each one of us; and so we are all potential scientists discovering ourselves. We at Nature Club are hopeful that the journey of the participants in this event helped them discover the scientist within them.

~ Team K. C. Nature Club
